

DICE CRICKET

Practice scoring with a simple game of dice cricket.

1 2 3 4 5 6

ONE RUN

TWO RUNS

NO RUNS

FOUR RUNS

OUT

SIX RUNS

When a 5 is rolled, you then roll the dice again to determine how the batter was out. However, if you then roll another 5, the decision is overturned!

1: Bowled, 2: Caught, 3: Run out, 4: LBW, 5: Not out, 6: Stumped

You can play on your own or with someone else!

Create two teams. There are six 'balls' per over, and 5 overs per team. After 5 overs, swap over and see which team wins.

DICE CRICKET (continued)

Each side of the dice has a different outcome in the game. If you roll a 1, 2, 4 or 6, then that is how many runs you get. If you roll a 3, then you do not get any runs and write down a 'dot ball'.

If you roll a five, then you are out. You then roll the dice again, to find out how you were given out, whether it is bowled, caught, run out, LBW, or stumped. However, if you roll another 5, then you are not out and you write it down as a dot ball.

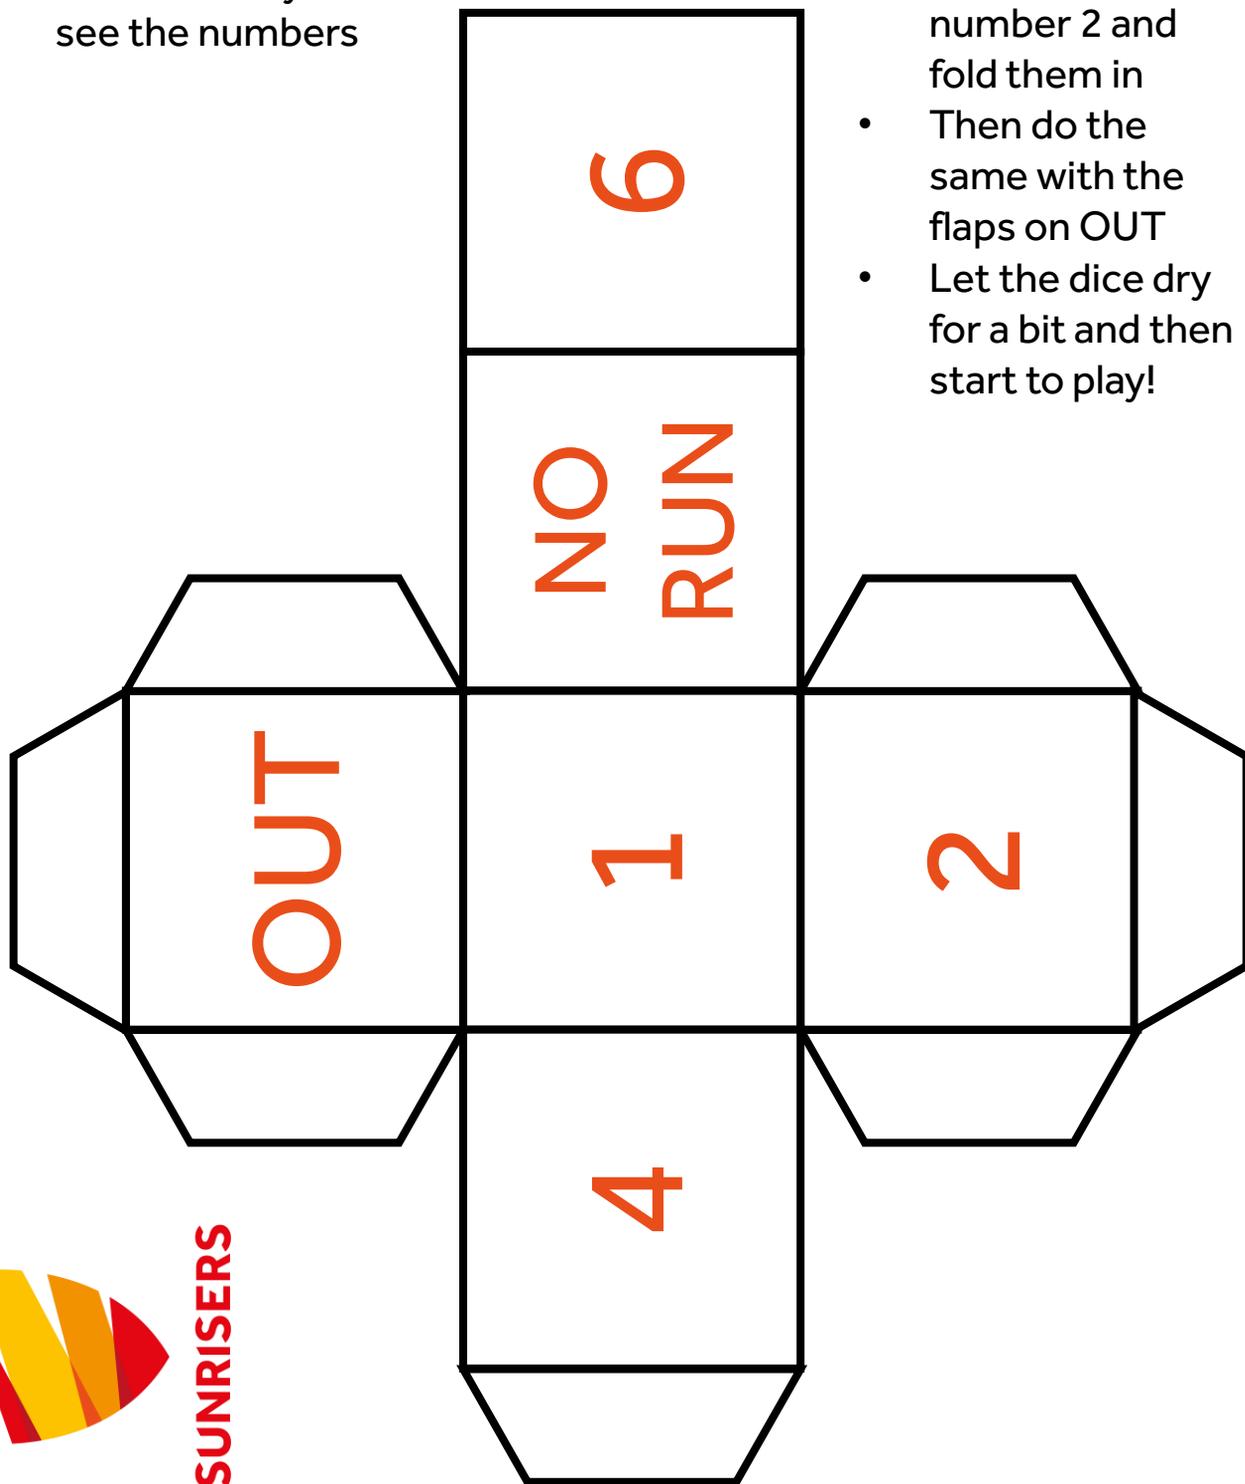

If you do not have a dice, then print out the dice template and follow the instructions to put it together, so that you can enjoy playing this game. Use our scorecard to keep score in your game.

MAKE YOUR OWN DICE

1. Print out this page
2. Carefully cut around the edge of the shape
3. Fold all of the inside lines so that you can see the numbers

4. Glue the extra flaps so that the dice sticks together
 - Stick the flap on number 4 onto the back of number 6
 - Then glue all of the flaps on number 2 and fold them in
 - Then do the same with the flaps on OUT
 - Let the dice dry for a bit and then start to play!
